

May 24, 1989; 9:36 am - I continued my call to Sue Kennedy at E&E to discuss the resampling investigation for Richardson Flat. I told Sue that MITRE didn't know of any policy prohibiting resampling particularly when it is done in response to comments.

We agreed that the resampling should occur in June, close to the time of the original (1985) sampling inspection. I said that, because of the sensitive nature of the case, I would need to be involved in the details of the sampling plan, particularly the background sampling point.

Sue also noted the issue of how to define "adequate freeboard"; we'll ask Werner Raab in a conference call that we should have in the next few days. I noted that we should probably plan to include both filtered and unfiltered samples. Sue asked how the results should be presented and I suggested that there should be just one comprehensive report that addresses all of MITRE's and the PRP's comments.
